

Solar power station light tower

Overview

A solar power tower, also known as 'central tower' power plant or ' heliostat ' power plant, is a type of solar furnace using a tower to receive focused sunlight. It uses an array of flat, movable mirrors (called heliostats) to focus the sun's rays upon a collector tower (the target). Concentrating. United Rentals carries a comprehensive selection of portable light towers for rent, perfect for your next construction or infrastructure project. Battery powered with diesel backup for longer runtime and reliable performance. Dimmable LED flood lights provide brilliant illumination. Each model offers two independent solar wings (1100 to 2250 Watt options) with advanced technology bi-facial panels; high-efficiency LED floodlights; and long-life, deep-cycle AGM.
