## Overview

---

Africa's energy landscape is transforming, with off-grid solar storage solutions playing a pivotal role in bridging the electricity gap. Over 600 million Africans still lack reliable grid access, making decentralized solar-plus-storage systems a sustainable and cost-effective. UAE-based Global South Utilities has begun construction on a 50 MW solar project with 10 MWh of battery energy storage systems (BESS) in the Central African Republic. 5 GW of new solar PV capacity in 2025, representing a 54% increase from 2024, according to the Global Solar Council. These additions occurred amid ongoing electricity supply challenges.

BANGUI, Novem- Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui. Developed by Global South Utilities (GSU), a subsidiary of Abu Dhabi's Resources Investment LTD, the project is equipped with 81,000 solar panels and 158. The groundbreaking ceremony was attended by CAR's leaders, alongside officials from GSU UAE-based investment firm Global South Utilities (GSU) has officially broken ground on a 50-megawatt solar photovoltaic (PV) power plant in Sakai, marking a transformative milestone in the Central African. Operational since Q2 2023, this \$420 million hybrid facility combines 180MW solar PV with 76MW/305MWh battery storage - making it Sub-Saharan Africa's largest integrated renewable energy project. But here's the kicker: it's reduced diesel generator use in Bangui by 63% within its first year.
