

Spi solar photovoltaic panels

Overview

SPI Solar (SPI) (Solar Power, Inc) is a vertically integrated photovoltaic solar developer offering its own brand of high-quality, low-cost distributed generation and utility-scale solar energy facility development services. SEM Wafertech, a wholly owned subsidiary of SPI, will produce silicon wafers at the new facility as it ramps its Made-in-USA production capacity to 3.4 gigawatts MCCLELLAN. SPI Energy Co., (NASDAQ:SPI) (the "Company"), a global renewable energy company and provider of solar storage solutions for business, residential, government, logistics and utility customers, today announced its subsidiary Solar4America. The Solar4America module manufacturing facility now produces 700MW with capacity ramping up to 2. This follows the company's January announcement to increase solar module production to 2.
