

Thailand Energy Storage Power Supply Procurement Latest

Overview

Thailand's Energy Regulatory Commission (“ERC”) has issued an updated notification¹ (the “2025 ERC Notification”), revising the execution timeline for power purchase agreements (“PPAs”) under the 2024 first additional FiT procurement round. This update forms part of the National Energy Policy. This week's ASEAN sustainability roundup highlights developments in energy storage, green transport, and renewable fuels. The Philippines has passed a national Energy Storage Systems (ESS) Act. Thailand moves to secure data center investment by tightening power purchase rules ahead of the Feb. 8. Nevertheless, Thailand's decarbonisation commitments in its Nationally Determined Contributions (NDCs) under the Paris Agreement have triggered new rounds of renewable energy deployment, with over eight GWp of greenfield wind and solar projects announced or in the procurement pipeline. This initiative will enable businesses to source renewable energy directly from producers, including solar farms, facilitating a faster. Electric vehicles (EVs) are widely known for their battery power but batteries are also crucial for buildings, factories, and power plants using renewable energy. Battery energy storage systems (BESS) are. Thailand intends to source nearly 35,000 MW of new electricity from renewables as it looks to reach carbon neutrality and net zero commitments. There are plans to increase storage capacity, but it may not.
