

The 0N main switch of the solar panel is turned on

Overview

The first step is to locate the main solar breaker within the home's service panel and firmly flip the switch to the "ON" position, allowing AC power from the grid to reach the inverter. This action provides the initial signaling power the inverter needs to begin its internal checks. Ensure that the solar panel is properly connected and functioning; 2. It should be labeled as 'AC switch' or 'Solar Supply Main Switch. ' Step 2 - Turn Off the DC Turn off the DC isolator, which is typically. The manual shutdown procedure can be a useful tool for solving errors and glitches that you're experiencing with your solar PV power system. After that you must turn off the AC breaker.
