An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteries, supercapacitors, or flywheels. T...

Home Energy Storage (Stackble system)

- 
High Efficiency
- 
Easy installation
- 
Safe and Reliable
- 
Perfect Compatibility

Product Introduction

-  Scalable from 10 kWh to 50 kWh
-  Self-Consumption Optimization
-  Integrated with inverter to avoid the compatibility problem
-  LFP battery, safest and long cycle life
-  Stackable design for easy installation
-  Capable of High-Powered Emergency-Backup and Off-Grid Function
