

# The first DC microgrid in China

## Overview

---

On November 10, the innovative and pragmatic digital DC microgrid mutual assistance demonstration project created by Guangdong Transport Company was officially started at the Dahuai Service Area on the Kaiyang section of the Shenhai Expressway, marking another key step for Guangdong. On November 10, the innovative and pragmatic digital DC microgrid mutual assistance demonstration project created by Guangdong Transport Company was officially started at the Dahuai Service Area on the Kaiyang section of the Shenhai Expressway, marking another key step for Guangdong. On November 10, the innovative and pragmatic digital DC microgrid mutual assistance demonstration project created by Guangdong Transport Company was officially started at the Dahuai Service Area on the Kaiyang section of the Shenhai Expressway, marking another key step for Guangdong Province to. In this Special Report, Yang Dechang summarizes current research on and deployment of microgrids in China, including an overview of the history of microgrids in China, two examples of microgrid projects currently operating in China (Dongao Island and Sino Singapore Tianjin Eco-City), progress on. At the start of 2024, Tencent installed an innovative microgrid — dubbed the “green heart” — at our Tianjin data center. This cutting-edge system combined solar power with small-scale battery storage, setting a new benchmark for green energy in data centers. Less than a year later, we have achieved. Ø LVDC technology development is supported by National Key R&D Program of China, which is highest research funding in China. Ø PEDF system in buildings developed rapidly. In a statement, the grid said the original distribution grid is turned into a 750-volt DC. In Xuzhou, Jiangsu Province, a new energy vehicle industrial park features a 52,000-square-meter array of photovoltaic panels integrated with an energy storage system, forming a self-sufficient microgrid. This system generates nearly 7 million kilowatt-hours of electricity annually, fully powering.
