

# The largest photovoltaic panel in terms of power generation

## Overview

---

In June 2024, China connected the 3.5 GW Midong solar project near Ürümqi in Xinjiang to the grid, making it, at that moment, the world's largest single operational PV plant. The installation spans desert terrain and is reported to generate around 6. World's largest photovoltaic power stations in 2024. [1] Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer. This SolarPower. Guide infographic explores the largest solar power plants in the world based on solar energy capacity: Click the below image to view full-size. Agua Caliente Solar Project - 290 MWp Located in Yuma County, Arizona, the Agua. As of October 2024, China, United Arab Emirates, and India have taken over as the leading developers of large-scale solar power projects.
