

# The largest solar container battery in a wind farm

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.

## Overview

---

The Moss Landing Energy Storage Facility is located in California, USA. The facility uses lithium-ion batteries to store the "excess" from solar and wind power plants. These combined systems, also known as hybrid parks, balance the feed-in for greater stability of the power grid. Vattenfall's newly built Haringvliet Energy Park in the. Battery storage systems enhance wind energy reliability by managing energy discharge and retention effectively.

## The largest solar container battery in a wind farm

### Battery storage systems

Vattenfall operates large battery storage systems in combination with wind and solar parks at several locations in Europe. These combined systems, also known as hybrid parks, balance the feed-in for ...
