

# The latest news on European energy storage systems

## Overview

---

The EU installed a record-breaking 27.1 GWh of new battery energy storage system (BESS) capacity in 2025, with Germany and Italy topping the chart again, while Bulgaria emerged as the fastest-growing market. 0) Public Domain. A new analysis from LCP Delta and Energy Storage Europe shows that pumped hydro storage holds the largest share of installed capacity at 50. The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy. A 100MW/200MWh BESS project in Estonia has been inaugurated by Baltic Storage Platform (BSP), a joint venture (JV) between Baltic developer Evecon, French independent power producer (IPP) Corsica Sole and investment manager Mirova. The report also projects. A group of industry stakeholders has published a joint statement calling for a sequenced EU framework to enable the deployment of long-duration energy storage (LDES). The statement highlights the role of LDES in strengthening energy security, reducing system costs, and supporting industrial.
