

The manufacturer promises to install photovoltaic panels on the grid

Overview

The system has to pass local electrical inspection and receive approval from the utility company to connect to the grid. Typically, solar panels perform best on south-facing roofs with a slope between 15 and 40 degrees, though other roofs may be suitable too. You should also consider the age of your roof and how long until it will need. 5KW Solar Power System is an innovative and affordable solar energy product which is designed to meet an average household electric need and at the same time help the environment. Add Powerwall to store your energy for use anytime you need it. Flexible financing and low monthly lease options can help you secure the best price for your solar system.
