

# The photovoltaic panel leads turn black

## Overview

---

Solar panel discoloration is predominantly due to what I term an 'uncontrolled chemical reaction.' This reaction happens between the lamination materials (including EVA) and the oxygen in the environment. Preventive measures such as using high-quality components, proper installation, regular cleaning and. One panel is black, all other panels are not black. It can affect its appearance and performance. Examine for physical damage, checking for cracks or defects on the panel.
