

The store uses solar power

Overview

The retail industry heavily depends on consistent and substantial energy use, making renewable energy crucial for its long-term viability. From cutting down electricity bills to showing customers a commitment to sustainability, solar power offers grocery stores a range of advantages. Poised to be key players in this movement are big box retailers, whose sprawling rooftops present vast untapped potential for solar energy generation. IKEA Bragging Rights: Ikea has a solar presence at 90% of its U. Cooking and providing a power source for electronic devices can also be achieved by using solar energy.
