

The warranty period of photovoltaic panels and components

Overview

Solar panels generally come with two warranties: The product warranty covers the equipment and typically guarantees at least 10-12 years without fail, and the power or performance warranty often guarantees at least 90% production at 10 years and 80% at 25 years. Like many aspects of a photovoltaic (PV) system, understanding solar. While many home appliances typically come with a basic warranty offering free replacements within a specified period, solar panels are protected by various types of warranties that cover a range of potential issues. The product warranty provides complimentary replacement of your solar panels in. A standard solar panel warranty should come with at least 10 years of protection, though many premium options now offer 25 or even 30+ years of coverage. Although the average panel lifespan is estimated at around 30 years, most clean energy systems pay for themselves in energy savings in just 12 years. It offers coverage against manufacturing defects, premature failure, and issues related to panel performance.
