

Togo solar off-grid system

Overview

Togo's off-grid solar energy sector represents a means of expanding access to electricity in the country. The government intends to create an environment favorable to the growth of this market and in 2017 launched the CIZO Program, which translates to "Light up" in Guin, a local. It is part of a series of briefing notes that provide a high-level overview of the status of countries' off-grid solar markets, as well as relevant policies and programs¹. The information and views expressed in this brief are GOGLA's alone and are based on our current understanding of the policy. Rooftop solar installations and standalone solar systems are becoming increasingly prevalent, particularly in urban areas. nd Renewable Energy Agency. Several companies, including BBOXX, EDF, and Sun King-Soleva, are actively working to promote universal access to electricity by developing innovative technologies and providing solar energy services to communities. ent grants to rural people. Image source: AfDB Togo has launched the "Café Lumière" initiative, a solar-powered community. The Togo Electrification Strategy developed and launched by the Togolese government in June 2018 prioritizes off-grid solutions to achieve universal access to energy by 2030. This program is funded by GIZ under the supervision of the L'Agence Togolaise pour l'Électrification Rurale et les Énergies Re ERGIE and.
