

# Twenty Mile Solar Power Generation

## Overview

---

In 2024, generators added a record 30 GW of utility-scale solar to the U. We expect this trend will continue in 2025, with 32. Xcel Energy updates Ten Mile Creek Project application filing timeline View News Release. The project would deliver approximately 300 megawatts of solar energy and 300. According to our latest Preliminary Monthly Electric Generator Inventory, developers and power plant owners added 20.6 GW (21%) more than the capacity added. LRE (Leeward Renewable Energy) is constructing Twelvemile Solar, three solar energy facilities in Bryan and Johnston Counties northwest of the city of Durant, Oklahoma. The oldest solar power plant in the world is the 354-megawatt (MW) Solar Energy Generating Systems thermal power plant in California.
