

# Types of solar power stations

## Overview

---

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale (PV system) designed for the supply of . They are different from most building-mounted and other decentralized because they supply power at the level, rather than to a local user or users. Utility-scale solar is sometimes used to describe this ty.

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power. They are different from most building-mounted and other decentralized solar power because they supply power at the utility level, rather than to a local user or users. Utility-scale solar is sometimes used to describe this ty...
