

# UAE coal-to-electricity energy storage device

## Overview

---

In a remarkable advancement for renewable energy, the United Arab Emirates, under the auspices of His Highness Sheikh Mohamed bin Zayed Al Nahyan, President of the UAE, has inaugurated the world's largest integrated solar and battery storage project. Dubai's Integrated Energy Strategy 2030 calls for 12 per cent of generating capacity from clean coal, 12 per cent from nuclear, 5 per cent from solar facilities and 71 per cent from natural gas by 2030. As one of the world's leading energy producers, the UAE is not only diversifying away from oil but also investing heavily in advanced battery. Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Combining solar energy generation with advanced.
