

# Uganda communication base station wind power hybrid power source

## Overview

---

This paper studies structure design and control system of 3 KW wind and solar hybrid power systems for 3G base station. The system merges into 3G base stations to save ion model for base station power consumption in light of the rise in mobile subscribers and BTS deployment in Uganda. Based on. This is the 25kwh battery stacked lithium LiFePO4 type with 5 battery layers and one off grid solar inverter on the top layer, each battery pack has a 5KWh capacity, you can also expand the battery to a larger capacity, and the 25kwh battery can support a parallel connection with a maximum of 15. Due to the widespread installation of Base Stations, the power consumption of cellular communication is increasing rapidly (BSs). Power consumption rises as traffic does, however. EMF AND MOBILE PHONE BASE STATIONS - Uganda's.
