

Ukrainian energy storage and dispatch power station

Overview

DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites that represents one of the biggest storage deployments in Eastern Europe. The European Bank for Reconstruction and Development (EBRD) is supporting Ukraine's energy security by lending €22.3 million to private Ukrainian energy company Power One for the financing of new peaking generation capacity and battery energy storage systems (BESS). The loan will enable Power One. Ukraine's 400 MWh battery project dwarfs most Eastern European installations, and is expected to come online in October 2025, ahead of the winter.
