

Uninterruptible power supply distribution box

Overview

At their core, UPS distribution boards are designed to manage the distribution of power from the UPS to multiple circuits, thereby protecting sensitive electronic equipment from power fluctuations, outages, and surges. Check each product page for other buying options. Only 20 left in stock - order soon. Uninterruptible Power Supply (UPS) Systems are units designed to supply electrical power to external devices for a few minutes during a power outage, allowing either the device to safely shut down or power to be restored. For use at home, industrial or network applications, UPS systems can provide. Learn how we've joined forces with Siemens Energy to fast-track data center construction and reduce deployment timelines by up to two years. Some orders may include non-recycled cardboard until stock runs out.
