

Vietnam utility-scale solar

Overview

According to Global Energy Monitor, the country currently operates 19. Vietnam's amendment to the National Power Development Plan VIII (Decision 768/QD-TTg) to 2030, reaffirms its commitment to renewable energy and positions Vietnam as a regional frontrunner in the global energy transition. A lecturer in Electronic and Computer Systems Engineering at RMIT Vietnam, Dr. With a rapidly expanding economy—now the fastest growing in southeast Asia—Vietnam has developed a large appetite for energy to fuel their surging growth. Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. According to the government's Power Development Plan 8 (PDP8), Vietnam will need approximately USD135 billion to increase its. Vietnamese authorities are looking to retroactively revise purchase prices for 173 solar and wind projects, reducing revenues by 25% to 46%, risking bankruptcies across the renewable energy sector, and jeopardizing investor confidence needed to meet the government's 2030 targets of 73 gigawatts. Our utility-scale solar solutions breathe new life into unused land, generating clean electricity for Vietnam. Our innovative approach allows for rapid redeployment when land needs.
