

West africa independent energy storage project

Overview

Independent power producer Africa REN has officially commissioned the Walo Storage project in Bokhol, Dagana department, northern Senegal. This marks the first solar PV installation in West Africa to integrate battery storage dedicated to frequency regulation. It covers 14 of the 15 countries of the regional economic community. In the context of the West African region moving towards a resilient and integrated power grid, West African Power Pool (WAPP) is pioneering the deployment of Battery. The project is the first solar and storage one with a BESS dedicated to frequency regulation in West Africa, the firm said. The facility combines 16 MW of solar. Westore is a full-stack energy storage system developer with a focus in the Commercial, Industrial, Agricultural and Mini-grid energy storage segments in South Africa and Africa.
