

# What are the styles of photovoltaic panels

Sample Order  
UL/KC/CB/UN38.3/UL

## Overview

---

The six main types of solar panels are polycrystalline, monocrystalline, thin-film, transparent, solar tiles, and perovskite. All of these are photovoltaic panels - meaning they use daylight to generate electricity - and they're all categorised based on their material. Learn efficiency, cost, and performance differences to choose the best panels for your home in 2025. Why trust EnergySage?

The type of solar panel you need depends on the type of system you want to install. When deciding, consider factors like your budget, roof size, sun exposure, and energy efficiency goals. The right panel can help you save on energy costs while matching your home's. There are many solar panel types, each with distinct characteristics, materials, efficiency rates, applications, and costs.
