

# What are the wind power plants in the north

## Overview

---

Data and information about Wind power plants and their location plotted on an interactive map of United States of America. Listed are wind farms with a generating capacity of at least 150 megawatts (MW) or any of the three largest farms in its state with a generating capacity of at least. Explore the largest wind farms in the US and see all the utility-scale wind projects in the US on a map. Michael is the CEO of Cleanview. His reporting on clean energy and data centers has been cited in The New York Times, Wall Street Journal, and hundreds of other publications. It involves using wind turbines to convert the turning motion of blades, pushed by moving air (kinetic energy) into electrical energy (electricity). The creation of this database was jointly funded by the U. Department of Energy. Forged Ethic Wind Energy Project (Project) is a 323-megawatt (MW) wind project currently under development in Coconino County, Arizona.
