

What is the patent for photovoltaic combiner box

Overview

The invention relates to a smart PV (photovoltaic) string combiner box with protection functions, for example electric contactor functions, overvoltage protection functions as well as monitoring functions. A PV string combiner box is used to bring the output of several solar strings. This application relates to the field of photovoltaic technologies, and in particular, to an inverter, a combiner box, and a photovoltaic system. a photovoltaic system generally includes a photovoltaic. Embodiments of this application disclose a design of an inverter and a design of a combiner box, to reduce maintenance costs of a photovoltaic device. a plurality of photovoltaic cell components operate together to generate power.
