

What to do if the photovoltaic panel is too high

Overview

If solar panels are installed too high and do not light up, there are several steps to take: 1) Assess the installation conditions, 2) Inspect for any obstructions, 3) Evaluate the angle and positioning, 4) Consult with a professional to determine necessary adjustments. Identify the issue with the current voltage, 2. Consider. High voltage might sound exciting — but if you don't reduce solar panel voltage, your system could be in for a shocking surprise. Too much juice flowing in can fry batteries, strain inverters, and turn an efficient setup into an expensive repair job. This panel pair goes into a Victron 100 volt 50 amp MPPT controller and then out to my 12v battery bank. Let's unpack why panel height matters more than you might think. Photovoltaic panels generate 18-22% less power when installed above 15 feet due. The VOC is the Open Circuit Voltage - is your solar panel or a solar array is producing too many volts?

If so, there is a simple way to reduce the number of volts that a solar panel sends down the circuit.

What to do if the photovoltaic panel is too high

How to reduce solar panel VOC (Important!)

The VOC is the Open Circuit Voltage - is your solar panel or a solar array is producing too many volts? If so, there is a simple way to reduce the number of volts that a solar panel sends ...

PRODUCT INFORMATION

- BATTERY CAPACITY
50kWh-500kWh
- DC VOLTAGE RANGE
400V-1000V
- DEGREE OF PROTECTION
IP54
- OPERATING TEMPERATURE RANGE
-10-50°C

What to Do When Your Photovoltaic Panel Installation Is Too High

You've invested in solar energy to cut electricity bills and reduce carbon footprints, but what happens when your panels are mounted higher than recommended? Over-elevated photovoltaic installations ...
