

# What type of solar panel is used for light generation

## Overview

---

Photovoltaic solar energy is a technology that efficiently converts sunlight into electricity through the utilization of solar panels composed of photovoltaic cells, such as those by SMA Sunny Boy. This energy can be used to generate electricity or be stored in batteries or thermal storage. Below, you can find resources and information on the. Solar energy stands out as one of the most promising renewable energy sources available today. Sunlight is composed of photons, or particles of solar energy.
