

# What wire should be used for photovoltaic panel ground wire

## Overview

---

Article 690 of the NEC mandates that #8 AWG or #6 AWG are the smallest wires that can be used with grid tied solar panels and inverter systems, and for solar panel output circuits, #10 or #12 AWG are allowed. A ground rod is also recommended if the installation area is prone to. Therefore, you must ground solar with the right wire sizes. Can I use 12 AWG wire for my grounding wire?

(I ran out of 12 AWG wire) It's supposed to be 10 awg per 250. Check your local electrical codes. Whether you're a DIY enthusiast or just want to understand the process better, this. Photovoltaic grounding is a key element of a photovoltaic system, ensuring its safety and reliability.
