Unplug everything from the outlet. Plug in a small lamp or nightlight to check if it restored power. If it works, the reset was successful! If it doesn't, press and hold the Test button until the Reset button pops out (this ensures it's working). Then try. The GFX-220 is a new type of 20 amp 240 volt feed through Ground Fault Circuit Interrupter (GFCI) specifically designed to withstand the high frequency noise and spikes caused by Variable Speed Pumps, LED lighting and transformers.
