

Will the price of inverters drop

Overview

Recent data from procurement platforms indicate microinverter prices declined by almost 12 percent from the prior period, compared to an 8 percent drop for string inverters. Wood Mackenzie's latest analysis expects market uncertainty in China, Europe and the U. to cause two consecutive years of contraction in the global solar inverter market, forecasting a fall to 577 GWac this year and 523 GWac in 2026. Image: Lauri Veerde, Wikimedia Commons, CC BY-SA 4. Although a price difference persists, the overall installed cost gap closes rapidly, leading engineering, procurement, and. The global solar inverter industry will contract over the next two years as major markets in China, Europe and the US confront new volatility, according to energy market analyst Wood Mackenzie. Globally, Woodmac forecasts that inverter shipments will contract 2% in 2025 and a further 9% in 2026. As the demand for renewable energy surges, solar inverter prices in 2025 continue to evolve, influenced by technological advancements, increased manufacturing, and global energy policies. 25 per watt) are cheaper than microinverters (\$0. Power Capacity: Residential systems (3–10 kW) average \$1,200–\$3,500 per unit, while commercial systems (30–500 kW) range from \$10,000–\$80,000. Efficiency Rates: Premium models with 98%+.
