

World s largest solar photovoltaic panel

Overview

In June 2024, China connected the 3.5 GW Midong solar project near Ürümqi in Xinjiang to the grid, making it, at that moment, the world's largest single operational PV plant. The installation spans desert terrain and is reported to generate around 6. China has transformed a vast stretch of shallow coastal waters into the world's biggest open-sea solar power facility, capable of powering millions of households. The HG14 project off Dongying in Shandong province reached full grid connection in late December 2025, marking a leap in offshore. In Hanggin Banner and Dalad Banner, each site is set to develop 2 GW of solar power, with Dalad Banner planning an expansion to a total capacity of 13. Surpassing Midong, it will become the largest photovoltaic station.

World s largest solar photovoltaic panel

The 9 largest solar farms in the world [2026]

Commissioned in 2019, Golmud Solar Park in China's Qinghai Province comprises 80 separate solar plants with over 7.2 million solar panels providing a capacity of around 2,800MW, making it the ...
