

Yanglinzhai Solar Power Plant

Overview

This hydro-solar hybrid power plant has a total installed capacity of 1 GW. The plant was connected to the grid in June 2023 and has an annual energy yield of 2 billion kWh, enough to power one million households. The plant fully considers the needs of the local animal husbandry. The Kela PV Power Plant is located in the Yalong River Basin in China's Sichuan Province, at an altitude ranging from 4,000 to 4,600 meters. Constructed by Yalong River Hydropower Development, also known as Yalong Hydro, the Kela station aims to expand the renewable energy capacity of the Yalong River basin and. With installation of 523. Originating from Bayan Har Mountains. In the province of Sichuan in western China, Huawei helped Yalong Hydro build the first phase of the Kela PV Plant.
