

Young man made his own solar power plant

Overview

Luis Plata Cavazos has received national recognition for his entrepreneurial career, which began with the dream of clean energy for all. Building your own photovoltaic installation is a remarkably effective alternative to turnkey solar solutions. This hands-on approach can cut costs in half while giving you full control over every stage of the project. A homeowner in the Lot region of France shows that with some technical know-how. Using a local river, scrap metal and dynamo, Wangare built a hydroelectric power station in the town of Njumbi. This Great Big Story was made in partnership with Dangote:. To help you correctly answer these questions for yourself, the man in this video will walk you through how the process went for him, starting with “ Will it be worth it?

” and ending with his overall level of satisfaction with the results. In an earlier post, the man mentioned how his solar energy would power 5 ACs, 3 water heaters, an electric oven, an induction cooker, a microwave, and a freezer. That day, he brought power to a school.
